About Us

Rostwa Engineers is a Ugandan engineering company established in 2009. We provide project management, consultancy, and construction services across a range of sectors. Our work is grounded in technical expertise, responsible practices, and a focus on delivering practical, long-term infrastructure solutions.

With a team of engineers, architects, and project professionals, we collaborate with clients to deliver efficient, cost-conscious, and well-managed projects. Our approach reflects a commitment to improving quality of life through infrastructure that serves communities today and into the future.

Our History

Rostwa Engineers began in 2009 as a small initiative led by two individuals, Eng. Obwor Emmanuel and Mwaka Isaac Phillip who saw the need for more practical and community-aware engineering services. Starting with limited resources, the focus was on learning from each project and understanding the challenges faced in delivering reliable infrastructure.

Along the way, the company has grown steadily, shaped by lessons from the field, client feedback, and experience gained over time. Our journey has included working on a range of development projects, especially in education, health, and community settings.

Now in our 16th year, Rostwa continues to operate with a strong sense of purpose delivering work that is technically sound, locally relevant, and mindful of long-term impact.

Mission & Vision

Our Vision

To become the leading engineering company in East Africa by 2040, providing affordable professional services and products to enhance the quality of life.

Our SAID Mission

To Provide affordable, professional civil engineering solutions in East Africa, empowering our clients and partners to achieve their project goals. Grounded in Environmental Stewardship, our team adds value through **SAID**;

- ✓ Seeing the bigger picture while focusing on the finest details.
- ✓ Aligning our vision with our client's objectives.
- ✓ Innovation and embracing creativity.
- ✓ Delivering excellence in quality, timelines and cost efficiency.

Our RICHH Core Values

- **01** Responsibility to the community in which we operate.
- **02** Improve quality of life.
- **03** Continuous improvement in our ways of work.
- **04** Hard work & productivity.
- **05** Honesty & Fairness.

Why Choose us?

Proven Track Record

Over 16 years delivering high-quality infrastructure projects across the East African region

Technical Expertise

Multidisciplinary team of engineers, Qs, Project managers, and technicians.

On-Time Delivery

Strict adherence to project timelines through efficient planning and execution.

Client-Focused Approach

We design and deliver with the client's needs and community in mind.

Licensed & Compliant

Fully registered with UNABCEC, ERB, and tax-compliant in Uganda.

Sustainable Development

We prioritize environmentally sound and socially inclusive solutions.

Our Leadership

Eng. Obwor Emmanuel
Managing Director

Ms. Atim Juliet
Human Resource
Manager

Mrs. Anek Berna Otto
Finance Manager

Our Services

Construction

We execute high-quality civil works including roads, drainage, bridges, and institutional buildings. Our construction teams ensure structural integrity, safety compliance, and efficient delivery across all project phases

Consultancy

We provide expert engineering consultancy for project feasibility, design, and cost estimation. Our engineers work closely with clients to develop practical, sustainable, and locally appropriate solutions.

Project Management

From initiation to handover, we manage timelines, budgets, contractors, and risks. Rostwa ensures seamless coordination and quality control to deliver successful projects on time and within scope.

Area Of Operation

Roads

Designing & constructing durable, cost-effective roads that connect communities and drive development.

- ✓ Small Bridges
- ✓ Drainage / stormwater
- ✓ Low Volume Road Pavements

Structure

Engineering strong, functional, and efficient buildings tailored to client needs and community growth.

- ✓ Industrial Buildings
- ✓ Schools & Hospitals
- ✓ Real Estate Development

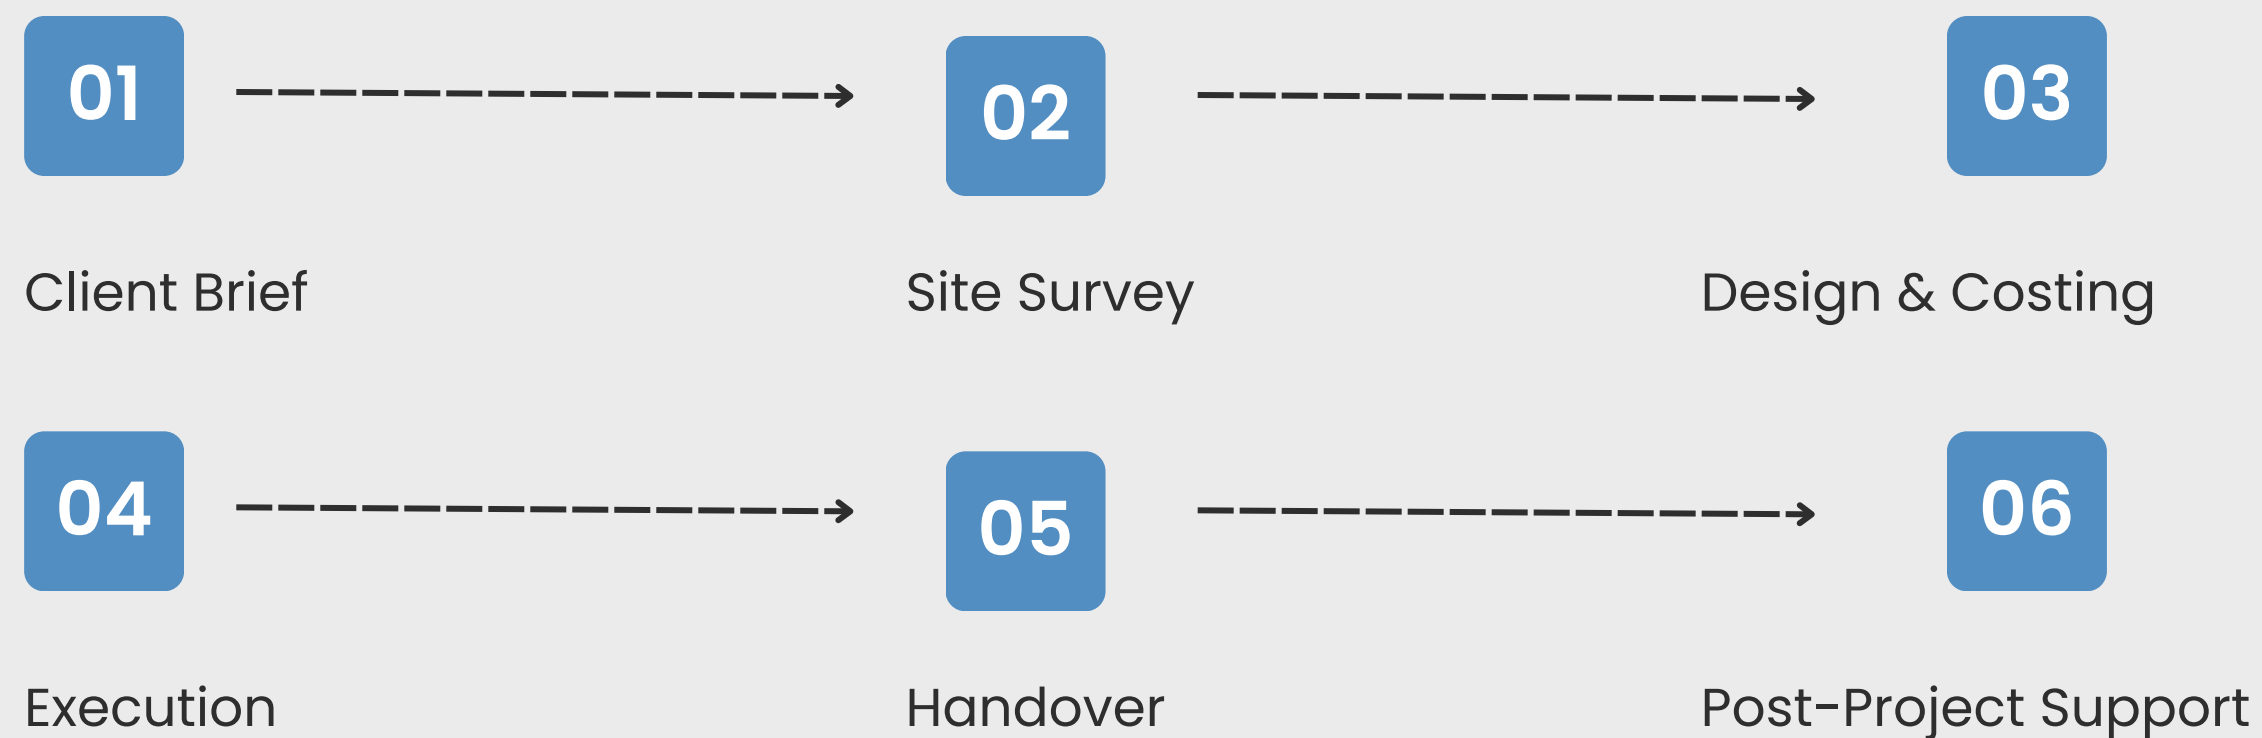

Water

Delivering smart, sustainable water and sanitation systems that improve lives and protect the environment.

- ✓ Water Supply Systems
- ✓ Wastewater Treatment
- ✓ Solar-Powered Irrigation

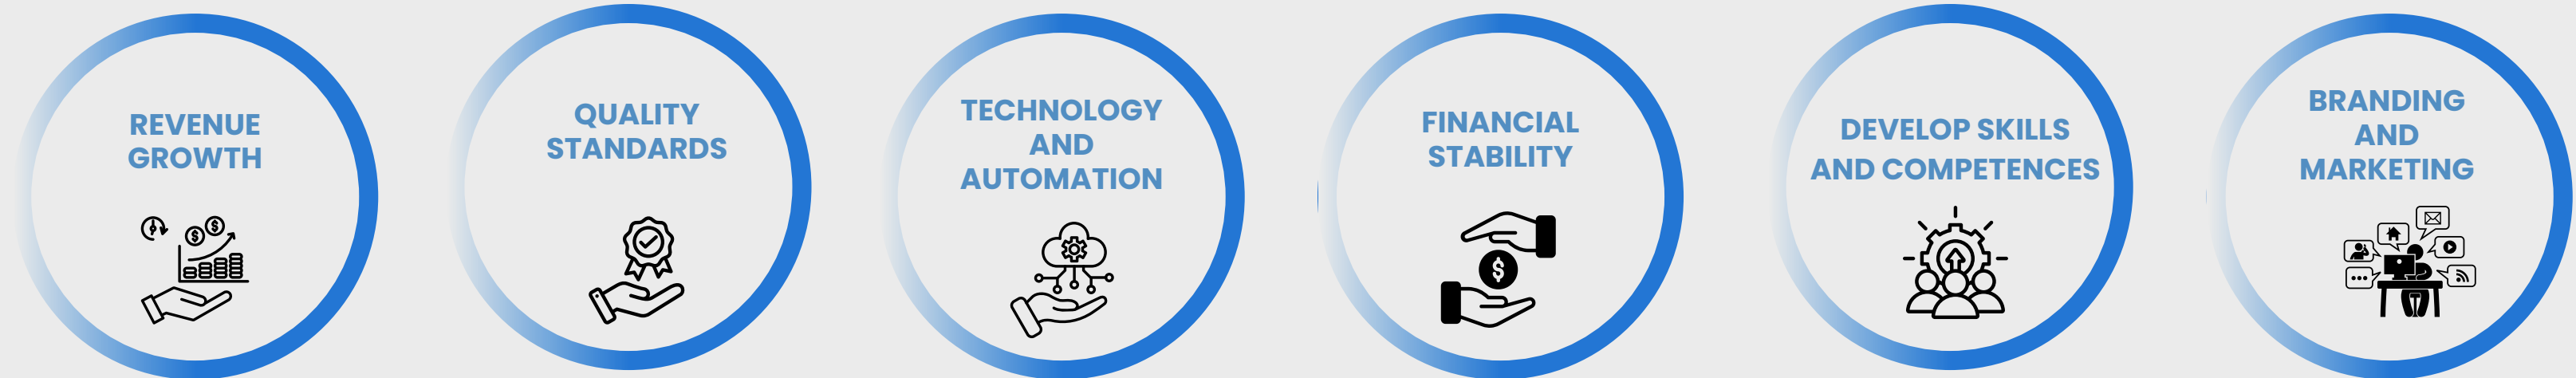

Our Approach

At Rostwa Engineers, we follow a results-driven process designed to ensure quality, accountability, and sustainability in every project we undertake. The ROSTWA Approach simplifies complex engineering workflows into three practical stages, guiding every project from concept to completion.

WIGs to Achieve

To drive our mission forward and stay aligned with our vision, the Rostwa Strategic Plan 2025–2030 identifies six Wildly Important Goals (WIGs). These focus areas guide our operations, shape our investments, and reflect our commitment to excellence while delivering value across every level of the business.

Excellence With
Value

Milestones

2009

Rostwa Engineers was founded in Kitgum Town by Eng. Obwor Emmanuel and Mr. Mwaka Isaac Phillip, following the completion of their project contracts. The name “Rostwa” reflects the company’s focus on Roads, Structures, and Water

2019

In 2019, Rostwa Engineers commemorated 10 years of operations. The anniversary was marked by internal reflections and planning, including the conceptualization of a future permanent headquarters.

2024

In 2024, Rostwa Engineers marked its 15th anniversary. The occasion recognized the steady progress made in project delivery and team growth. The year also saw the introduction of the Rostwa Development Fund, an internal initiative aimed at supporting staff through affordable credit access.

2025

In 2025, Rostwa Engineers launched its Strategic Plan (2025–2030), outlining the company’s direction for sustainable growth and service excellence. During this period, the company also updated its mission, vision, and core values to better reflect its evolving identity and purpose.

Clients Say

Bishop Ceaser Asili Memorial Hospital

Rostwa Engineers were instrumental in expanding our hospital facilities. Their design-build expertise and collaborative approach made the project a success. We're extremely satisfied with the results.

MSMMC

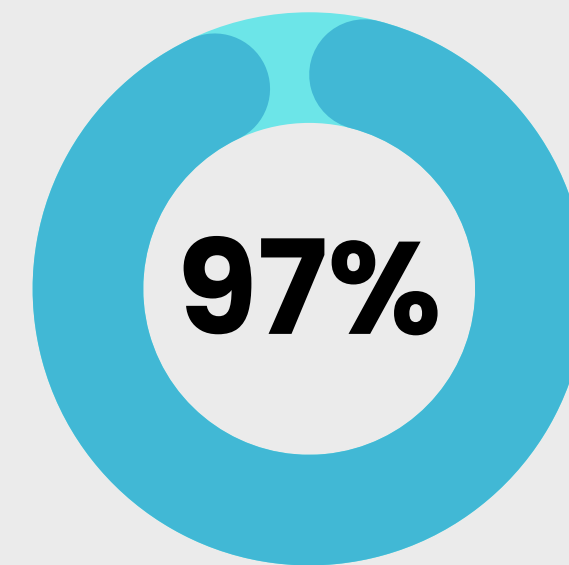

Rostwa Engineers provided excellent solar power installation services. Their expertise and professionalism made the project a breeze. We're now saving money and reducing our environmental impact

St Clare Children's home

Rostwa Engineers built an exceptional new school for our community. The high-quality construction and well-designed facilities are perfect for our growing student population

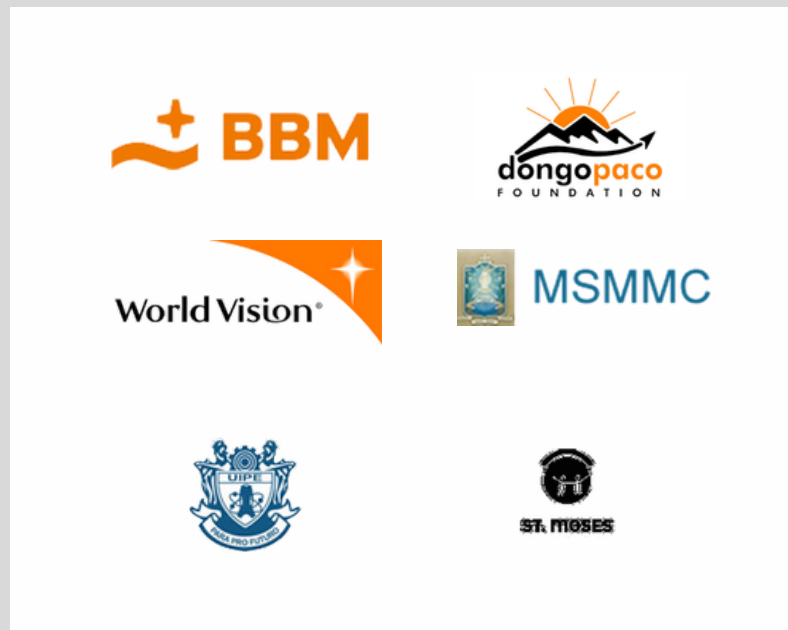

DPFL

Their excellence in construction management and their ability to stay on schedule and within budget were invaluable. We're so grateful for their partnership in bringing our vision to life.

Client Satisfaction

Clients & Partners

At Rostwa Engineers, we value the relationships we've built with our clients and partners across various sectors. Their trust in our expertise has shaped our journey and strengthened our commitment to delivering quality infrastructure solutions.

Our collaborations span local governments, non-profits, private developers, and international organizations each one contributing to meaningful, community-focused projects

Community Impact

At Rostwa Engineers, impact goes beyond engineering. In every community we work in, we remain mindful of people, the environment, and the future we help shape.

We express this through:

- Annual CSR engagement, supporting local initiatives that promote hygiene, education, and well-being
- Sustainable engineering practices that reduce waste and encourage efficient resource use
- Environmental stewardship, including participation in campaigns focused on clean air, plastic reduction, and safer spaces
- Local employment, offering job opportunities and practical skills to residents around our project areas

This reflects our core value. Responsibility to the Community in which We Operate and reinforces our belief that every project should leave a positive mark.

Rostwa Development Fund (RDF)

Empowering Our People, Sustaining Our Purpose

Launched in 2024, the Rostwa Development Fund (RDF) is an internal support initiative designed to improve the financial well-being of our employees. Through this structured fund, team members can access affordable loans to meet personal or family needs promoting dignity, stability, and peace of mind.

The RDF reflects our belief that a company grows stronger when its people are supported not just professionally, but personally too. It is managed with transparency and aligned to our values of Responsibility, Fairness, and Continuous Improvement.
